PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer with hands-on experience building and deploying an end-to-end machine learning application — including model development, evaluation, and a production-style Flask API. Trained in supervised learning fundamentals (DeepLearning.AI) and AI foundations (IBM), with applied exposure to quantitative and credit-risk modeling through a J.P. Morgan simulation. Comfortable across the ML pipeline: data preprocessing, feature engineering, model evaluation, and deployment.

TECHNICAL SKILLS

AI/ML: scikit-learn, XGBoost, PyTorch, TensorFlow, NumPy, Pandas, Feature Engineering, Model Evaluation

Languages: Python, SQL, HTML5

Backend: Flask, Flask-CORS, Unicorn, RESTful APIs

Tools & Deployment: Git, GitHub, GitHub Actions (CI/CD), pytest, Render, Vercel, Netlify

Concepts: Supervised Learning, Regression & Classification, Data Preprocessing, Model Evaluation & Explainability

PROJECTS

CreditWise — AI-Powered Loan Approval System | [GitHub](#) | [Live Demo](#)

Python, scikit-learn, XGBoost, Flask

Machine learning system that predicts loan approval eligibility from applicant financial and demographic data, delivered as a decision-support application with a trained classification model and REST API.

- Trained and evaluated a stacking ensemble classifier (Logistic Regression, Random Forest, and XGBoost) for binary loan-approval prediction, achieving 95.79% accuracy and 0.9865 ROC-AUC on hold-out data
- Performed data preprocessing, feature engineering, and model evaluation on applicant financial and credit data to improve prediction reliability and reduce bias in loan decisions
- Developed and deployed a Flask REST API (/predict, /health) serving real-time model predictions, with input validation and rule-based prediction insights
- Automated testing and deployment with pytest (~98% backend coverage) and GitHub Actions CI, running tests and lint/build checks on every commit

CERTIFICATIONS & ACHIEVEMENTS

- Supervised Machine Learning: Regression and Classification** — DeepLearning.AI (Sep 2026)
- IBM AI Foundations** — IBM (Aug 2026) | Trained in ML, deep learning, and real-world AI application fundamentals
- J.P. Morgan — Quantitative Research Job Simulation** — Forage (Feb 2026) | Completed a hands-on simulation in credit risk modeling and quantitative analysis, including loan portfolio risk estimation

EDUCATION

B.Tech in Automation and Robotics

2024 - 2028

Dr. D. Y. Patil Institute of Technology, Pune | CGPA: 8.5/10.0
